

Vest Sizing Guide

Phoenix #2030 Pro-Max Youth

Phoenix #2035 Pro-Max 1000 Youth

Fitting Instructions:

This vest requires measurements of the chest, waist and spine. Remember, the vest is designed to be adjustable. Growing children should select the size in which they fall into the lower side of the measurement range. This will allow room for growth.

Reference the size chart to select the most appropriate size for your measurements.

Chest - Measure at the widest point, to a snug fit. See diagram A.

Waist - Measure at the natural waist. See diagram A.

Spine - Measure from the small bump at the back of the neck down to just below the waist. This measurement is best achieved while seated in a chair or saddle. Due to the adjustability of the shoulders, the vest can be shortened or lengthened. A size range rather than one single spine measurement represents this. See diagram B.

If you need assistance with size selection, contact your local dealer or Phoenix Performance.
